

Building Services Consulting Engineers

Healthcare

Healthcare

Today's climate demands healthcare projects which are well designed, cost effective and delivered on time and on budget.

We believe this can be achieved through good planning, forward thinking, client and design team interaction and careful consideration of the finished scheme.

The building services elements within healthcare premises accounts for a large proportion of the overall capital cost, and as such need to be designed carefully to co-ordinate with the buildings structure, other services and the aesthetic look whilst still providing the same performance and usability.

Wooster Jeffs Associates pride themselves in designing exceptional healthcare premises to meet the future demands of their users and aid in providing comfortable stimulating environments for both staff and patients.

Brain Tumour Unit - UCLH

MRI Unit - L&D Hospital

Our design engineers have a wealth of experience within healthcare for both the public and private sector.

Wooster Jeffs provides full electrical, mechanical and public health design and management services for the modern building services environment.

Projects are undertaken with an approach focusing, not only on good engineering principals, but looking at issues such as life costing, future maintenance and sustainability.

- Concept design
- Feasibility studies
- Preliminary engineering
- Detailed design
- Project management
- Cost management
- Energy surveys
- Condition surveys
- Technical reports

X-Ray Department - Lewisham Hospital

Brachytherapy Unit - Mount Vernon Hospital

Skills Lab - UCLH

Skills Lab - RBHT

The benefits of choosing Wooster Jeffs Associates

Wooster Jeffs Associates provide a professional pro-active approach to all projects with dedicated staff working from conception to completion. Some of the major benefits of choosing Wooster Jeffs include:

- A total range of services
- A dedicated experienced design team with a wealth of knowledge in the healthcare sector
- An excellent understanding and knowledge of specific Healthcare Regulations such as the HTM Design Guidance, the MEIGaN Regulations and the NHS Fire Codes
- Pro-active participation throughout the project and excellent communication with the client and design team members
- Innovative design solutions and forward thinking design approach
- An in-depth knowledge of healthcare services and demands
- Energy efficient and sustainable design solutions
- Certified under ISO 9001 - 2008
- Certified under ISO 14001 - 2004

Pathology department - UCLH

Clinical Skills Lab - RBHT

Experience

Wooster Jeffs Associates have a broad depth of knowledge and experience in the healthcare sector. This experience has given us an understanding of the varied requirements needed to suit each specific department within healthcare premises. We have undertaken projects in most healthcare departments both as new build and refurbishments including:

- General wards
- Recovery wards
- X-Ray departments
- MRI departments
- Pathology departments
- Pharmacy departments
- Interventional suites
- Theatres
- Office and administration accommodation
- Training and skills labs
- Major plant and infrastructure
- Building management systems design
- Modular buildings

Over the years we have built long standing working relations with clients and other Professionals; we have a very high level of repeat business and pride ourselves on our excellent customer relations. Some of our healthcare customers include.

University College London Hospital (UCLH)

Lewisham Hospital

Luton and Dunstable Hospital

Royal Brompton Hospital

Harefield Hospital

Mount Vernon Hospital
